

Your TRUCK SECURED throughout Europe, from our 24/7 Operations Center

MEMBER OF
TAPA EMEA
Transported Asset Protection Association

Your goods and transports? Entrust them to experts

The protection of vehicles, and especially goods transported throughout Europe, is guaranteed 24/7 by Multiprotection's Operations Center, according to increasingly advanced and customized service and configuration profiles.

Our offer starts with **PASSIVE** security, where the activation from the Operations Center occurs by way of the Customer's notification.

On the other hand, **ACTIVE** security solutions are ideal when a fast response is essential following notifications originating from on-board systems.

Lastly, customized **PREVENTIVE** or **MAXIMUM SECURITY** solutions are implemented in situations in which the value of the goods requires the highest level of attention before, during and after transportation, in order to ensure **BUSINESS CONTINUITY**.
